## ABOUT ME

I am currently an entry-level software engineer focused on backend development and building reliable systems that handle data processing and API integrations. I have hands-on experience developing web applications and working on academic and project-based systems where I contributed to backend logic, system integration, and data flow management. I am eager to learn from industry professionals, contribute efficient and scalable backend solutions, and continuously grow alongside evolving software engineering technologies.

## EDUCATION

| TERITARY                                                                                           | SECONDARY                                                                                    |                                                                        |                                                             |
